PT. Daksa Lintas Sarana (DLS)

was established in year 2005 and currently manage the business in construction and procurement especially for Telecommunication Network Development and Installation.

In year 2011, the Management and Board of Commissioners decided that DLS will be participating in the EPC Pipeline works.

And to show our commitment and seriousness in achieving optimum performance in pipeline business, one of the step is to prepare the permit issues by Oil and Gas Directorate General and apply Quality Management System that adopt CIQS 9001:2000

In 2018, we began to enter the renewable energy business and our choice was to develop Solar Energy, in developing this business we collaborated with **PT. Musti Solar Bisnis** as a consultant.

We are always certain that “experience” and “skilled human resources” are the main keys to the successful achievement, which we have both elements to support us now.

Engineering & Construction in the following areas Building design and Build.

- Financial Model PLTS Roof Top
- Roads
- Transport fuel & emissions

Goals : "Total Quality For Our Client"

Reliability, Innovation & Harmony's is our managerial philosophy which embodies DAKSA people's willingness to offer their service to the society and the people world wide

Reliability : The key to growth

DAKSA people is always striving to keep reliability of our both clients & society. They put the client satisfaction first in everything, they do and try to share everything with the client. This spirit of reliability will always demonstrate our impressive project. Timey and accurate judgment, competitive price, total quality and reliable to service are the sources of DAKSA's reliability.

Innovation : The Basic of Progress

DAKSA stresses innovative spirit based on creative and autonomy, in utilizing on this challenging spirit we continue to improve our technology, develop new materials and open new markets to ensure clients satisfaction.

Harmony : The Part To Achievement

DAKSA emphasized individual responsibility, autonomy, and personal development as the basis for harmonic corporate efforts, such philosophy leads to greater organizational efficiency and harmony while many enterprise experience a variety of difficulties as they grow bigger, DAKSA works in the spirit of harmony through smooth communication and active cooperation which ultimately result in meeting the clients needs more efficiently.

Ready to face future challenge as we are entering the 21st century, the construction sector will continue to have an important role in the development of Indonesia. To fulfill the goal of becoming an industrialized nation, a great deal of investment in infrastructures factories, well as office and residential buildings will be needed. This means an even brighter prospect for construction service market, despite the inevitable increase in competition.

Anticipating these challenges, we develop an intensive growth strategy through market penetration and differentiation strategy directed toward competitive advantage through the creation of various new product and working methods.

Implement functional strategies in quality improvement, cost control, human resources development, marketing & finance, all of which are directed to ward customer satisfaction. We are ready for challenges of the future.
